

MPC TAKES ITS HEALTH, ENVIRONMENT, SAFETY AND SECURITY COMMITMENT TO A NEW LEVEL

Since 2001, MPC's health, environment, safety and security (HES&S) performance has been continually improving under the Responsible Care® Management System, and we are now moving into a more rigorous phase of HES&S management that represents a new level of commitment: RC14001® certification.

RC14001 is a management system that combines Responsible Care with the globally recognized ISO14001 environmental management system, established by the International Organization for Standardization. ISO, as the organization is called, is an independent, non-governmental international body that provides world-class specifications for products, services and systems that ensure quality, safety and efficiency.

"RC14001 is a more detailed, prescriptive set of standards than the Responsible Care Management System, and after more than 15 years of continual improvement in our HES&S performance, we are now going to hold ourselves accountable to this higher standard companywide," said Chairman and CEO Gary Heminger.

Four MPC organizations already certify to the RC14001 standard: the Detroit refinery; Terminal, Transport &

Rail; the Galveston Bay refinery in Texas City, Texas; and Marathon Pipe Line LLC. The rest of the company will begin certifying to the new standard in 2018.

Similar to Responsible Care, RC14001 provides the company a management system that integrates health, environmental stewardship, safety and security, and is third-party audited to ensure compliance and continual improvement.

"I couldn't be more proud of what we have accomplished under Responsible Care," said Heminger. "We are very well-positioned in our industry from an HES&S standpoint, and holding ourselves accountable to this higher standard will ensure we keep improving across all our operations."

"I couldn't be more proud of what we have accomplished under Responsible Care. We are very well-positioned in our industry from an HES&S standpoint, and holding ourselves accountable to this higher standard will ensure we keep improving across all our operations."

Gary Heminger, Chairman and CEO

MPC Responsible Care Coordinator Melissa Kinn oversees the company's implementation and compliance with RC14001, a more detailed, prescriptive set of standards.
